The MQ03 price plan is available to low voltage customers. Metering capable of recording half hourly data is not required on this price plan

The MQ04 price plan is available to low voltage customers. Metering capable of recording half hourly data is required on this price plan.

The MQ05 price plan is available to transformer customers. Metering capable of recording half hourly data is required on this price plan.

The capacity charge (code -CAPY) is a daily charge applied to the capacity of your connection to the network.

The demand charge (code -DAMD) is a daily charge applied to the average of your ten highest kVA demands (twice the kVAh half hourly reading) between 08:00 and 20:00 (time periods 17 to 40) on weekdays including public holidays in any one month.

The power factor charge (code -PWRF) is a daily charge applied where your power factor is less than 0.95 lagging. This charge is applied to the kVAr amount represented by twice the largest difference between the kVArh amount recorded in any one half-hour period and one third (to two decimal places) of the kWh demand recorded in the same half-hour period during each month with a power factor less than 0.95 lagging. The charge is applicable to the kVArh determined between 08:00 and 20:00 (time periods 17 to 40) on weekdays including public holidays.
